**Subject:** EPA "Well to Compliance" Query

Good morning George,

I've gotten a query from the district regarding the wells failing their MITs and for these to be returned to compliance under EPA regulations. My understanding is these can't be considered "returned to compliance" just by a shut-in but should either be P&A'd or remediated. I'm trying to find the relevant regulations to explain this - can you please point me to the correct section - thanks.

Also, I'll be available for a VC with you either Thursday or Friday AM to discuss current AE applications. Let me know what's suitable with you.
